

Shared-Use Roads

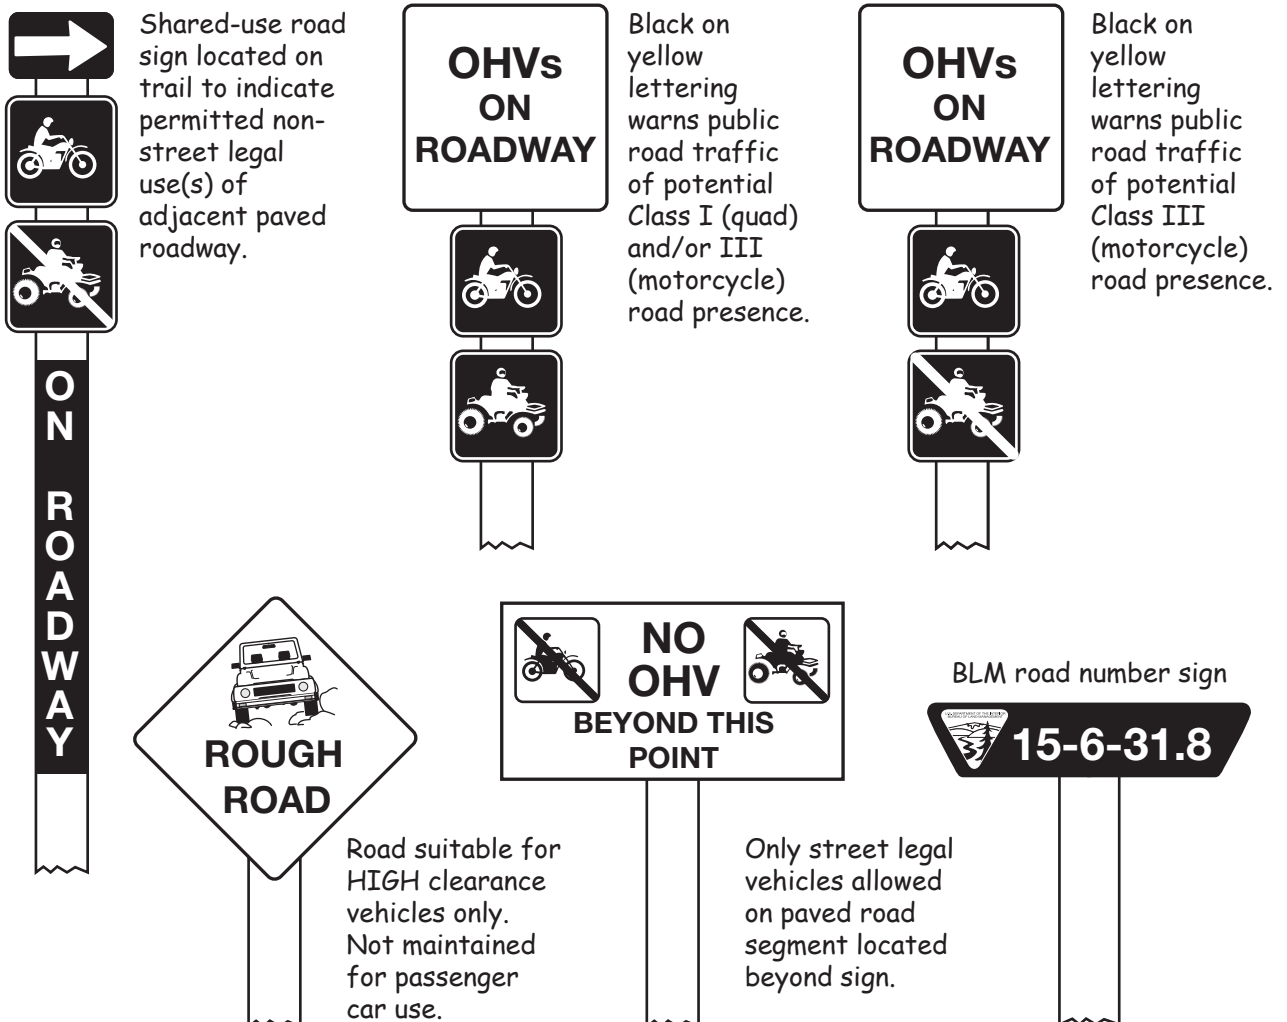

The shared-use road segments shown on the map are the only paved road segments open to **unlicensed (i.e., non-street legal) motorcycle and/or quad vehicles**. All other paved roads in the Shotgun OHV Trail System boundary are closed to non-street legal vehicles.

From trails, riders can determine when they are entering a shared-use roadway by the placement of steel posts with accompanying "ON ROADWAY" signage. Public traffic is warned by the placement of a 24-inch "OHVs ON ROADWAY" sign.

For safety reasons, Type I ATVs (i.e., quads) are not allowed on the following shared-use road segments: (1) Dollar Road between Dollar Staging site and Trail #2, (2) Shotgun Creek Road north of the Crooked Creek Road (BLM 15-1-19) junction, and (3) Seeley Creek Road (BLM 15-1-19.1) between Shotgun Creek Road (BLM 16-1-5) junction and BLM Road 15-1-18 junction (see map).

Type I ATV enthusiasts are encouraged to utilize the Crooked Creek Staging site to access nearby trails open to Type I vehicles. Likewise, to access Trails #16 and #17, quad and less-than-expert motorcycle enthusiasts should park and unload their vehicles on gravel roads adjacent to those trails.

Signing

Open to motorcycles

Open to All Terrain Vehicles less than 50" wide

Open to Jeeps and other 4x4s

Closed to the identified vehicle.

Degree of Difficulty

Difficulty ratings are assigned to trails under ideal conditions. They are based on difficulty comparisons with other trails in the area. A trail rated easiest within the Shotgun OHV System could be rated differently elsewhere. Trail conditions are always subject to change due to the weather and other acts of nature.

Easiest
(green circle)

More
Difficult
(blue square)

Most
Difficult
(black diamond)

Identification Marker

Signing located at the trail/road intersection indicates trail direction, number, authorized / unauthorized use(s), and difficulty level.

Reassurance Marker

Flexible posts with a direction arrow and trail number. Trail difficulty logo is included only when a change in difficulty occurs.

Hazard Marker

White on red lettering indicates the base of a 1-way, MOST DIFFICULT trail.

Junction Marker

Black on white lettering indicates a differently-numbered trail ahead

Closure Marker

Signing located in middle of trail to indicate temporary closure.

Trail/Road Intersection Marker

Caution signs are located where trails intersect main roads.
